Kolkata, West Bengal

Little Millennium is one of the largest pre-school chains in India. We operate over 750 pre-schools across 100 cities in India. Running such a large and growing operation requires state-of-the-art back-end systems. While we had some great systems in place for tracking leads, franchisee management, etc. our accounts, purchase order handling and inventory management had always been a challenge. We were considering upgrading from Tally and were zeroing in on SAP B1 but then considered RealBooks seeing positive reviews from some other companies. Given we have offices in Gurgaon, Mumbai, and Bangalore, being connected was essential and that was something Tally was unable to provide.

We had a very smooth implementation of RealBooks and were live in 45 days including migration of old data from Tally for all the different locations. Being online has really helped, more so during these times of lockdown where our team has been able to work from home and start the audit process. RealBooks has allowed us to streamline our accounting, compliance, order management and inventory and also allowed us to back-up and reference all our documents electronically (truly a unique feature!). It has also ensured that I don't have to depend on anyone to view the reports.

I wish to place on record our appreciation for the pro-activeness of the RealBooks team throughout the implementation and their readiness to support our team for any queries they have even now. I wish the Realbooks team all the very best.

Regards,

**Raman Bajaj**
